

TABLE 2B. Selected Expenditures, Crude Ore Mined, and Value of Net Shipments for Selected Industry Groups and Geographic Areas: 1963-Continued

(For explanation of column captions see Introduction)

Industry group and geographic area	Selected expenses (\$1,000)					Capital expenditures (\$1,000)			Crude ore mined (1 000 short tons)	Value of net shipments of primary products (\$1,000)
	Total	Supplies purchased for resale, and purchased fuels and electric energy	Minerals received for treatment	Contract work	Purchased machinery installed	Total	Development and exploration of mineral property	Plant, other construction, machinery, and equipment		
Geographic Areas			19,256							
Continued			19,256

• Represents expenditures during the year for both new and used plant and equipment.

• Represents gross shipments of the mineral indicated by the industry name less minerals transferred to other establishments for treatment or less minerals received from other establishments for treatment.

• Represents net shipments by all industries.

• Includes ore valued chiefly for copper produced in other industries, amounting to less than 0.01 percent of the United States total.

• The cost of minerals received for treatment is combined with the cost of supplies, purchases for resale, and purchased fuels and electric energy.

• Represents lode ores only. In addition, 23,774 thousand cubic yards of placer gravels were washed in the United States to recover gold and silver.

• Represents manganese ores only.

• Includes in addition to net shipments, the value of secondary products and resales.

• Represents mercury and uranium-vanadium ores only. In addition, for the United States, 25,720 thousand short tons of crude titanium ores were mined for processing, and small quantities of antimony ores, beryllium ores, platinum sands, rare earths, and zirconium ores.

• Figures for East North Central are included with those for West North Central.

• Includes figures for South Atlantic.

• Includes in addition to net shipments, the value of secondary products and services.

• Represents uranium-vanadium ores only, except that the value figures for Mountain include the value of secondary products and services of the Uranium-Radium-Vanadium Ores Industry.

• Represents receipts for metal mining services in all industries.
